CAPABILITY STATEMENT

OUR COMPANY

Callen Constructions is a family-owned and operated company specialising in concrete and formwork within the civil construction sector. Our skilled team possess extensive experience in the formwork industry, guaranteeing that every project is completed on schedule and to the highest standard. We have utilized various formwork systems, including Peri Form and RMD Form, to effectively adhere to design, time, and budget requirements.

We are proud to operate under a certified management system compliant with ISO 9001 for Quality, ISO 14001 for Environmental Management, and ISO 45001 for Occupational Health and Safety. Our Vicroads Bridge Maintenance (M2-BW) prequalification further highlights our commitment to delivering high-quality projects while prioritizing safety and environmental responsibility. You can rely on us for excellence in every aspect of our work.

MISSION

Delivering high quality civil concrete & formwork solutions that drive innovation and sustainability in constructions.

OUR VALUES

SAFETY

WE ARE COMMITTED TO PROVIDING A SAFE AND HEALTHY WORKING ENVIRONMENT, COMPLYING WITH RELEVANT REGULATIONS

QUALITY

OUR COMMITMENT TO DELIVERING EXCEPTIONAL OUTCOMES FOR OUR CLIENTS IS UNMATCHED. WE CONTINUOUSLY ENHANCE OUR SKILLS TO GUARANTEE THE HIGHEST STANDARD OF RESULTS

TIME MANAGEMENT

ENSURING PROJECTS ARE DELIVERED WITHIN THE BUDGET AND ON TIME.

SUSTAINABILITY

WORKING WITH CLIENTS TO DEVELOP AND IMPLEMENT EFFICIENT & ENVIRONMENTALLY RESPONSIBLE BUILDING PROJECTS

SERVICES

CIVIL INFRASTRUCTURE

Our concrete repair and construction services include specialized work on FRP (Form Reo Pour), rail infrastructure, culverts, and bridges. We are dedicated to maintaining and enhancing critical infrastructure with precision and high-quality craftsmanship.

CONCRETE REMEDIATION

Our comprehensive concrete remediation and repair services include drainage pit repairs, precise grouting, effective crack injection, and the repair of expansion joints. Each of these tasks is essential to maintaining the integrity and longevity of infrastructure, ensuring both safety and durability.

BRIDGE REMEDIAL WORKS

Our bridge repair services include the maintenance and restoration of bridge decks and expansion joints. We ensure that all repairs are performed to the highest standards, enhancing the safety and longevity of critical infrastructure.

EARTHWORKS

Our excavation services include demolition, bulk earthworks, site preparation, and the availability of both wet and dry plant hire. Each of these offerings is designed to facilitate efficient and effective project execution from start to finish.

PLANT & EQUIPMENT

We provide an extensive selection of plant and specialty equipment that are readily available. If you can't find what you're looking for, we can obtain it for you through our network of trusted business partners. Our plant & specialty equipment include;

8t Excavator

15t Excavator

Telehandler

Skid Steer

Water Trailer

Compressor Trailer

Specialty Concrete Tools

Generators

Pressure Washers

& more...

PROJECT PORTFOLIO

2023-2024

SEPA & Laing Orouke

Coolstore Rd Level Crossing Removal

Our works included constructing foundations for multiple buildings, parkiteer, and waste enclosure, along with four lift pits, four stair foundations and platform infill decks, and a generator slab.

2018-2019

Winslow Infrastructure

Bonnie Brook Road Bridge

Constructing a new bridge, meticulously forming and pouring concrete to ensure its structural integrity and longevity. This project highlights our commitment to high-quality craftsmanship and robust infrastructure development. The design and construction were carefully planned to avoid disturbing the Growling Grass Frog which is found in the Kororoit Creek below.

PROJECT PORTFOLIO

(CONTINUED)

DM Roads / Transurban Expansion Joints & Pit Repairs

Repairing expansion joints & drainage pits on bridges, ensuring their durability, structural integrity & proper water management preventing structural damage. This vital maintenance work helps to safeguard the bridges integrity and extend its lifespan.

2022-2024

Seymour Whyte

Healesville Koo Wee Rup Rd Duplication

Forming and pouring culverts and fauna crossings as part of a road duplication project, ensuring efficient water flow and safe wildlife passage. This critical infrastructure work highlights our dedication to sustainability and precise engineering.
